TEAM ID: PNT2022TMID01461

PROJECT NAME: AI-powered Nutrition Analyzer for Fitness Enthusiasts

Run The Application

- Open the anaconda prompt from the start menu.
- Navigate to the folder where your app.py resides.
- Now type the "python app.py" command.
- It will show the local host where your app is running on http://127.0.0.1.5000/
- Copy that localhost URL and open that URL in the browser. It does navigate to where you can view your web page.
- Enter the values, click on the predict button and see the result/prediction on the web page.
- Then it will run on localhost:5000

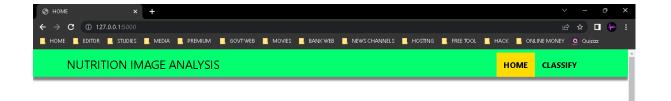

Navigate to the localhost (http://127.0.0.1:5000/) where you can view your web page.

Click on classify button to see the results.

OBJECTIVE OF THE PROJECT

- Food is essential for human life and has been the concern of many healthcare conventions.
- Nowadays new dietary assessment and nutrition analysis tools enable more opportunities to help $people \ understand \ their \ daily \ eating \ habits, \ exploring \ nutrition \ patterns \ and \ maintain \ a \ healthy \ diet.$
- Nutritional analysis is the process of determining the nutritional content of food.
 It is a vital part of analytical chemistry that provides information about the chemical composition, processing, quality control and contamination of food.
